1. Describe the main aim or purpose of what it is you are planning to do?

Wording revision.

2. Who is likely to be affected by this policy, service or change?

Recipients and ILF Scotland.

3. Do you have enough information to know what the potential impact might be on diverse groups and what that might look like?

The protected characteristics to consider are: Age, Disability, Sex, Race, Religion or Belief, Gender Reassignment, Sexual Orientation, Marriage and Civil Partnership, Pregnancy and Maternity. It will also be helpful to consider these groups more widely in relation to their socio-economic status that includes such factors as educational attainment, occupation, income, wealth and social deprivation.

Please mark as Yes or No. If yes use the Comments column to describe what the potential impact is. What are your sources of evidence?

(Try to think about both positive and negative impacts. There are lots of sources of data to help answer this question. Diversity Networks, the Diversity Report or Diversity & Inclusion team may offer some useful information. Previously completed EQIAs may also offer answers to questions you may have).

Age: Yes

Comments: Older people may have reduced income such as when they retire and receive their pension, or if in receipt of benefits these may reduce when someone reaches state pension age. Additionally, older people in particular maybe impacted by the increasing cost of living.

Is there evidence of any impact on other groups not covered by the protected characteristics? If yes use the Comments column to describe what the potential impact is, what you could do to remove/reduce any negative impact and what you could do to benefit from any positive impact.

(For example, carer status, single parent, economic exclusion. It is important not to limit your thinking just to the protected characteristics listed above. This question is broadening the EQIA out to be more inclusive. The impact might be a negative one (e.g. making that decision could decrease the opportunity for some people to participate) or it could be a positive one (e.g. by making that decision, more people are able to take part in the activity).)

Carers: Yes

Comments: Carers are identified as more likely to live in poverty and / or live on a reduced income. Equally they will be impacted by the ongoing increase in the cost of living.
